Work Experience

[Seven Technology](#)   Mangalore, Karnataka

Android Engineer   December 2024 **– Present**

1. Outsourced to a product-based client company based out in UK, "[Zinc Systems](#)".
2. I am managing two live projects here "[Zinc Reporter](#)" & "[Zinc Verify](#)" Android app.
3. My job role includes resolving production bugs, sprint ticket planning and adding new features in the app.
4. Revamped the existing workflow in the app to make the user experience better and faster as per client requirement.

[Bombay Software's](#)   Ahmedabad, Gujrat

Senior SDE 2 – Android   June 2022 **– October 2024**

1. I was working with an offshore client team, "[Volentio Group](#)".
2. Automated the build and release process for the app development life-cycle using Continuous Integration and deployment (CI/CD) pipelines, eliminating 100% time required for releasing builds manually.
3. Developed and optimized applications with 100% online and 80% offline functionality to ensure seamless user experience.
4. I was managing two long-term projects, delivering 100% client-requested features weekly in an agile, sprint-based environment, resolving of bugs, optimizing app performance and reducing manual testing effort by 50% by adding automated Unit & UI Test cases.

[Pairroxz Technologies](#)   Jaipur, Rajasthan

Android Developer   November 2020 **– May 2022**

1. Built multiple small apps in eCommerce – retail, online reservation booking using MVC & MVVM.
2. Implemented Real Time Chat feature to reduce waiting time between customer and admin by 80%.
3. Successfully converted 100% app written in Java to Kotlin.

Seven Web-E-Powers   Jaipur, Rajasthan
Android Intern   January 2020 **– May 2020**

1. Did this internship as a part of college final year training, mainly worked on android app development.
2. Learned to make API calls and handle raw data for app implementation.

Projects

Zinc Reporter App
December 2024 – **Present**

1. This is a incident management and reporting app, where users can report incidents of multiple type eg. Fire, robbery, emergency etc, then those incidents will be reported to managers who then handle it further.
2. Added a new dynamic form for a particular type of incident.
3. Resolved production level bugs and made sure app runs smooth and error free.

Zinc Verify App
December 2024 – **Present**

1. This is a reported incident management app, where mangers can manage reported incidents and assign people to patrol the places where incident happened to verify it.
2. I revamped the entire patrol verification flow for user, so they may quickly locate checkpoints where incident happened.

Accountune – Accounting Made Easy
January 2024 – **May 2025**

1. This is GST Billing and accounting software where user can create invoices, sales, track balance sheet, reports etc.
2. I built the entire android app by myself.

Starboard App
February 2023 – **October 2024**

1. Developed a Yacht Finance Management app based on client requirement which gives per account-based Yacht related information on app like daily transactions, receipts, purchases etc.
2. Added a server sync functionality which updated all actions performed by user in offline mode smoothly on web server when user gets into network range with 100% accuracy and correctness.
3. Implemented Automated app deployment on Closed and Internal test on play store so tester and client can access app freely anytime.

LMAO - Funny Memes & Jokes
September 2023 – **April 2024**

1. Created a meme app using a Reddit Image scrapper and then replaced it with Instagram Image/Video Scrapper "InstaTouch" gaining a boost in app download rate by 70%.
2. Scaled the organic reach in just 4 months to 5000+ download and nearly 220-350 daily active users.
3. Added 100% Offline caching using room database to handle data filtering on app even if user is offline.

See more of my projects in my Portfolio.
